

SUMMER YOUTH PROGRAM

Business & Sponsor Testimonials

“
”

We are thrilled at the opportunity to extend our interns - it's been really great watching them come out of their shells and pick up the skills needed in our dynamic work environment! We love our partnership with Career Source Central Florida and look forward to more success to come!

CareerSource Central Florida and its staff have been a life line for the Lady Storm Foundation, Inc. Staff have worked tirelessly to accommodate my needs for interns with specific skill-set that my organization required and I couldn't be more appreciative. I'll recommend CareerSource Central Florida to any business needing optimal service.

As a youth and education advocate I view the CSCF - Summer Youth Program as a blessing to businesses and the community! Our students/teens need more opportunities like what this program offers to teach the real life business soft skills and opportunities to build their resume before adulthood. In my three years of participating in this program, as an employer, I have witnessed students and families grow from the opportunities provided. The teens I employ look forward to summer to come back to our work family! With these students getting paid to train and work it gives them financial support and a professional mindset that is imperative to this generation. The career counselors allow this program to flow and have communication that most programs attempting this structure cannot obtain. Thank you for the opportunity for our children and businesses!

Addition Financial is proud to partner with CareerSource Central Florida and has been an enthusiastic supporter of the Summer Youth Program for several years. We are pleased to play a role - and share in the joy and success - in assisting teens as they journey down their first professional work experience and financial endeavors path.
